WORK EXPERIENCE

Independent Developer

Personal Projects 2023 – Present

- Design, develop, and deploy Android, web, and AI-powered applications end-to-end, owning the full lifecycle from requirements and prototyping through release and iteration.
- Build native Android applications using **Kotlin and Jetpack Compose**, and responsive web applications using **React, Next.js, TypeScript, and Tailwind CSS**.
- Apply a product-first approach, translating user needs into intuitive interfaces and prioritizing usability, performance, and maintainability.
- Integrate large language model (LLM) capabilities into applications to deliver intelligent, user-facing features.
- Practice version control, structured code organization, and iterative delivery across self-directed projects.

Open Source Contributor

Vencord 2025 – Present

- **Designed and built an AI style translation plugin** that leverages LLMs to translate text into user-selected writing styles and multiple languages.
- Contributed bug fixes and new features in TypeScript and React through pull requests within an established open-source codebase.
- Participated in code review, incorporating maintainer feedback and adhering to project coding standards and contribution guidelines.
- Collaborated asynchronously with a distributed community of contributors and maintainers.

Creator & Developer

Pleiadex Project / Hub 2025 – Present

- **Built and maintain a scripting platform serving nearly 1,000 users**, managing the product from architecture through day-to-day operations.
- Developed core platform systems, including user account management, secure script distribution, and release versioning.
- Established and enforced community moderation processes to maintain platform quality, safety, and user trust.
- Delivered ongoing updates and support based on user feedback, balancing new feature development with platform stability.

PROFESSIONAL SUMMARY

Results-oriented Information Technology student and self-driven developer with hands-on experience delivering Android, web, and AI applications. Proven record of building and operating a platform serving nearly 1,000 users and contributing to open-source software. Seeking an opportunity to apply strong technical fundamentals and a product-focused mindset in a collaborative engineering team.

EDUCATION

Bachelor of Science in Information Technology

Cavite State University – Tanza

2023 – 2028 (Expected)

Third-year student specializing in software development, AI, and web technologies.

Relevant coursework: Data Structures & Algorithms, Databases, Networking, Application Development.

TECHNICAL SKILLS

Android: Kotlin, Jetpack Compose, Java, XML

Web: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Node.js

Scripting: Python, Lua

AREAS OF INTEREST

- AI Development
- Kotlin Multiplatform
- Game Development
- Networking
- Software Development
